

```
CREATE TABLE Employee
(
    EmpID INT PRIMARY KEY,
    EmpName VARCHAR(50),
    Gender VARCHAR(10),
    Email VARCHAR(100),
    Department VARCHAR(30),
    Designation VARCHAR(50),
    Salary DECIMAL(10,2),
    Bonus DECIMAL(10,2),
    Experience INT,
    Attendance INT,
    Rating DECIMAL(3,1),
    City VARCHAR(30),
    JoiningDate DATE,
    EmployeeCode VARCHAR(20),
    Category CHAR(1)
);
```

Stored Procedure Tasks

Task 1: Add New Employee

Create a stored procedure that accepts all employee details and inserts a new record into the Employee table.

Task 2: Department Wise Employees

Create a procedure that accepts department name and displays all employees from that department.

Example:

```
CALL GetEmployeesByDepartment('IT');
```

Task 3: Employee Salary Hike

Create a procedure that accepts:

Employee ID

Hike Percentage

and updates the employee's salary.

Example:

```
CALL SalaryHike(101,10);
```

Task 4: Employee Details by ID

Create a procedure that accepts Employee ID and displays complete employee information.

Task 5: Employee Count by Department

Create a procedure that accepts department name and returns total employees in that department.

Use OUT parameter.

Task 6: Calculate Annual Salary

Accept Employee ID and return:

Employee Name

Monthly Salary

Annual Salary

Task 7: Transfer Employee

Accept:

Employee ID

New Department

and update the department.

Task 8: Highest Paid Employee

Create a procedure to display highest salary employee details.

Task 9: Bonus Distribution

Increase bonus by:

Rating $\geq 4.5 \rightarrow$ Bonus + 2000

Otherwise $\rightarrow$ Bonus + 1000

for all employees.

Task 10: Employee Promotion

Accept Employee ID.

If:

Experience ≥ 5

Rating ≥ 4.5

then change designation to:

Senior Employee

otherwise

Not Eligible

Trigger Tasks

Task 1: Prevent Negative Salary

Before Insert

If salary < 0

Set salary = 0

Task 2: Salary Update Log

Whenever salary changes:

Store old salary, new salary and update time in Salary_Log table.

Task 3: Employee Delete Log

Whenever an employee is deleted:

Store

Employee ID

Employee Name

Deleted Date

in Employee_Delete_Log table.

Task 4: Auto Joining Date

Before Insert

If joining date is NULL

Store current date automatically.

Task 5: Bonus Validation

Before Insert

If bonus is negative

Set bonus = 0

Task 6: Attendance Audit

Whenever attendance changes:

Store old attendance, new attendance and date in Attendance_Log table.

Task 7: Prevent Employee Deletion

If employee salary > 100000

Do not allow deletion.

Show message:

High Salary Employee Cannot Be Deleted

Task 8: Department Change Log

Whenever department changes:

Store

Employee ID

Old Department

New Department

Changed Date

Task 10: Employee Registration Log

Whenever a new employee is inserted:

Store record in Audit table:

Employee ID

Action = INSERT
